

PostBase® Fusion A120

PostBase® Fusion A120

Stylish. Secure. Connected

PostBase® Fusion A120 is a powerful mailing system that meets professional mailroom needs while offering advanced reporting and analytics options. Meticulously engineered with users in mind, this mailing system is intuitive and simple to use with a large adjustable touchscreen so that any operator can process mail with ease. Equipped with the most up-to-date Canada Post Intelligent Mail Indicia (IMI) technology, FP's PostBase® line fully meets all Canada Post standards and requirements.

Leading the charge on accessible solutions for fast, mixed-mail processing. The PostBase® Fusion A120 sets itself apart from other meters in its class by combining an advanced postage meter configuration, dynamic scale capability, and cloud-based Vision360 analytics and reporting. Offering a new solution to bridge the gap between enterprise-level machines and a growing mailroom's needs.

Pro Performance

The key to reliability and performance is the Stack & Go feeder with the large format feed deck and adjustable anti-skew rollers that automatically straightens mail to prevent stoppages.

SealCheck Sensor

Exclusive to FP's PostBase® line, SealCheck envelope sealers ensure security by validating that each envelope flap passes through the sealer.

Dynamic Scale

Accurately measure mixed mail using in-line dynamic weighing that measures the size and weight of each envelope as it passes through the scale.

MoCA

Parcel System Software

Paired with the PostBase® Fusion, MoCA is the perfect companion to send packages. This cloud based FP System will process and pay for parcels, with Real Time rates, using a Teleset (PAD) account. MoCA software prints Canada Post barcodes, enabling the user to track and trace their parcel shipments.

MoCA software offers cost control capabilities to keep shipping costs in check. This offers users up front savings starting at 8% compared to the mailing machine rates, with access to all discount levels based on volume usage.

FP MoCA also offers:

- Access to all Canada Post parcel services
- Track & Trace with Canada Post barcodes
- Cost control capabilities
- In-depth usage data report analysis
- Prints 4" x 6" self adhesive shipping labels with MoCA printer
- Easily linked to your mailing machine account

Vision360

Postal Analytics and Reporting

Created with exclusive technology, the PostBase® Fusion offers advanced postal analytics and reporting through Vision360. Accessible through the MyFP Customer Portal, Vision360 provides companies with a 360-degree view of postal usage to better monitor, manage, and control postal expenditures.

With the Vision360 analytics dashboard, you can get an operational overview of postal expenses, ink and postage on the machine, and postage downloads for better budgeting and planning. Getting the right report you need in the format required is easy. Report types are displayed on-screen as tiles or in a list view that can be sorted by favourites, alphabetical, report type, or subscription level.

Reporting Metrics Available:

- Postage Download
- Postal Usage
- Cost Accounts
- Postal Class (Advanced & Professional)
- Meter Operators (Advanced & Professional)

The Advanced subscription is included with your PostBase® Fusion A120 mailing system and offers additional reports over the Basic subscription. Additionally, the Professional subscription allows you to combine multiple metrics into a single report and offers more cost accounts.

PostBase® Fusion A120

MoCA Parcel System Software

Folder Inserter Interface

The PostBase® Fusion A120, combined with one of our FPi Folder Inserters, is the ideal solution to automate the process of manually moving finished envelopes from a folder inserter to the input of the PostBase® Fusion A120, reducing the number of steps of folding, inserting and metering mail from several steps to one.

Specifications

Dimensions	37.6"L x 17.3"D x 11.3-12.9"H
Dimensions - Dynamic Scale	55"L x 17.3"D x 11.3-12.9"H
